SUMMARY

Data Science undergrad with hands-on experience in full-stack development and AI-powered applications. Proficient in building end-to-end systems — from React/Next.js frontends and Node.js backends to REST API integration and MongoDB databases. Currently developing Fashion Exchange, an ML-driven fashion recommendation platform deployed on AWS. Skilled in deep learning, computer vision, and data preprocessing. Open to roles in ML engineering, full-stack development, or AI-driven product development.

EDUCATION

Shri Ramdeobaba College of Engineering & Management

Bachelor of Computer Science in Data Science (CGPA of 8.25)

Nagpur, India

Nov. 2023 – June. 2026

Government Polytechnic Nagpur

Diploma in Information Technology (Percentage – 88.20)

Nagpur, Maharashtra

Oct. 2020 – Sep. 2023

TECHNICAL SKILLS

Frontend : React, Next.js, HTML, CSS, JavaScript

Libraries : NumPy, Pandas, Lucide

Backend & APIs: Node.js, Firebase, Java, C++

ML & AI : Python, OpenCV, CNN, Deep Learning, Computer Vision,

Tools and Utilities : Jupyter Notebook, VS Code, GitHub, Google Colab, Tableau, PowerBI, Postman, REST API, AWS

Cloud Databases: MySQL, MongoDB, Query Optimization

Core Skills : Web Development, Data Analytics, DBMS

EXPERIENCE

IT-Networkz

Jul 2023 – Jan 2024

Web Developer Intern

Nagpur, Maharashtra

- Built 2 production applications using OOP and REST API integration with Firebase backend, implemented computer vision model for image processing.
- Collaborated in Agile cross-functional teams following SDLC practices; conducted unit testing with JUnit and maintained version control via GitHub as part of a CI/CD-aware workflow.
- Optimised API performance through schema redesign and real-time data handling, reducing response time by 20%; applied data preprocessing techniques to improve data pipeline efficiency.

Uptech Tree India Pvt Ltd

Jan 2026 – Present

Web Developer Intern

Nagpur, Maharashtra

- Developed and deployed the Trillion Apps company website at Uptech Tree India Pvt. Ltd., showcasing services including digital marketing, mobile app development, web design, and ERP solutions.
- Built a fully responsive and production-ready web application using modern frontend technologies, deployed on Vercel with optimized performance and cross-device compatibility.
- Developed a scalable frontend architecture using modern web technologies including React.js, HTML5, CSS3, and JavaScript (ES6+), ensuring maintainable and reusable component-based code structure across the entire application.
- Translated client business requirements into a polished, client-facing web presence, improving brand visibility and online engagement for a multi-service tech company.

PROJECTS

Fashion X | *NextJs., Nodejs, AWS S3, MongoDB*

- Developed an ML-powered personalised fashion recommendation engine matching users on 5+ parameters (size, height, age, style, colour); leveraged feature engineering to encode user preferences into model-ready inputs.
- Built full-stack platform with Next.js frontend and Node.js backend; integrated REST API endpoints and MongoDB for real-time data preprocessing and recommendation delivery.
- Designed and deployed scalable cloud-based media storage using AWS S3, enabling efficient image handling and faster content delivery for user uploads and fashion catalog assets.

Facial Emotion Recognition using AI – Driven Interviews | *OpenCV, Streamlit, CNN, MobileNet*

- Developed an AI-driven interview evaluation system using facial emotion recognition.
- Trained CNN + MobileNet deep learning model on FER dataset for real-time emotion classification; achieved high validation accuracy across 7 emotion classes using data preprocessing, feature engineering, and hyperparameter tuning.
- Applied computer vision techniques for real-time face detection, emotion analysis, and validated model predictions across diverse facial datasets.

CERTIFICATIONS

Certification: Tata Data Visualization — Built interactive dashboards using Tableau and Power BI.

Certification: Edureka Full Stack Internship Program — Developed full-stack web applications using React and Node.js.

Certification: Meta Introduction to Backend Development — Learnt REST API design, server-side logic, and database integration.

CO-CURRICULAR ACTIVITIES

Volunteer Educator — UandI Ngo [2024]

- Taught and mentored a batch of 10 underprivileged children, improving academic performance and confidence.
- Demonstrated social responsibility and community impact aligned with sustainable leadership values.

Guitar Performer — Inter-Branch Musical Band Competition [2024]

- Secured 2nd Runner-Up representing the branch in a competitive inter-branch musical band competition.
- Demonstrated teamwork, discipline, and composure under pressure.

Co-Head — Computer Workshop, Branch Event [2025]

- Co-headed a technical workshop where participants assembled and identified CPU components in a competitive format.
- Managed a logistics team of 7, coordinating distribution of CPU units and components across multiple groups of 4.
- Ensured smooth execution of both the knowledge session and the live assembly competition, handling high participant volume end-to-end.
